

TEACHER'S DECLARATION – 2010

We, teachers, commence the Academic Year 2010 with new determinations and new hopes and knowing that different challenges await us, we give you our assurance to work towards ameliorating our talents with the use of modern technology.

We accept it also as our responsibility to create students who love the religion, possess a good behaviour, and are wise and healthy. We also accept it as our responsibility to be aware of the students' potential, provide a friendly environment and productive learning for them along with opportunities to enhance their talents, as well as to offer help to those students requiring special attention.

We, teachers, carry a heavy responsibility on our shoulders. We believe that we play a huge role in the proper moulding of the children of this nation. This being the case, with God's blessings, we declare to improve the level of education and character-building we provide out students with every day.

Thank you!

STUDENTS' DECLARATION

We, students, are aware of our responsibilities and will fulfil these to the best of our ability. We will ensure that every step we take is in the path of the religion, that our every activity is in accordance with the teachings of the religion, and correct any which is not. We will work to becoming students who love the Maldivian traditions and keep them alive. We will respect our elders and teachers and establish a strong foothold in the path they show us. We, students, will listen to our parents, increase our interest towards studies, attend classes and co-curricular activities regularly, and work towards achieving the best results. We will also determine to achieve the best results in exams at the school level, national level, and international level.

We will attempt to be model students to our friends and work to improve the school's level. We will work, to the best of our ability, to become capable students, at ease with modern technology and reign with productive thinking. In addition to this, we will participate and co-operate with teachers in extra-curricular and co-curricular other activities, knowing that they are footsteps we take towards achievements. Being Maldivian students, we will make the best use of the academic years in becoming assets to the nation. Also, knowing the effort and expenditure expended by the government on the Maldivian students, we will make the best use of the facilities provided to become disciplined and educated children of the nation.

We pray to mighty Allah for His blessings in fulfilling this mission.
